Formát školenia

As a standard, we implement a full-time course (onsite or ILT *) in the ALEF Training Center. Upon agreement, it is possible to implement the course at the client's premises. The course can also be implemented online (vILT **) via a video conferencing platform - Cisco Webex meetings. Instructor-led virtual training is a combination of the best of a traditional classroom course and interactive training without having to leave your own office or the comfort of your home. Convince yourself of top quality transmission, video calls and effective team collaboration.

Explanations:

- ILT - Instructor Led-Training * - instructor-led training in the classroom. ** vILT (Virtual Instructor-Led Training) - this is a form of distance learning, where the instructor conducts training from the classroom through an online platform to which students connect from their offices or the comfort of their home.

Požadované vstupné znalosti

TCP/IP, and the experience with the operation of networks.

Študijné materiály

Participants will receive access to an electronic version of the study materials.

Osnova kurzu

- Overview - What is Flowmon?
- New Features in Flowmon technology
- Flowmon installation and requirements
- Basic settings
- Monitoring flows and network metrics
- Network anomaly monitoring - ADS module
- Application performance measurement - APM module
- Traffic capture and analysis - FPI module
- Protection against volumetric DDoS attacks - DDD module
- Storing NAT information for ISP-DR solutions
