Pre koho je kurz určený

Partners who completed the self-paced course

Čo Vás naučíme

- vSAN architecture and component overview
- Deploying and configuring a vSAN OSA and ESA single site cluster
- Create and analyze objects and components
- Enabling OSA and ESA feature
- Fault domains and availability design for a stretched cluster
- Stretched Cluster failures and replacement
- Configuring a two-node vSAN cluster and failures
- Remote vSAN datastore via cross-cluster
- Configuring vSAN iSCSI and file services
- Day-2 operations: decommission host, impact of host failures, monitoring vSAN cluster performance

Požadované vstupné znalosti

- Certificate of completion from VMware vSAN: Install, Configure, Manage [v8] self-paced course
- VMware vSphere: Install, Configure, Manage or equivalent knowledge

Študijné materiály

Participants will gain a solid understanding of operational and administrative aspects of vSAN, supporting their move toward certification and VCF integration projects.
